'Scholars & they are apparently acting on the advice of professors &c in Cambridge Germany respectively

With due deference to Dr Coleman's opinion it may be observed that a practical acquaintance with English methods of dairy work is not unlikely to be of use in course of time in Mysore

Sri Yagnanarayana Iyer seems to have taken the course of dairy work during a University vacation, as will be seen from an extract from a private letter,

The communication may be recorded.

Mycologist & Entomologist in charge of
the Agricultural Chemist's office, Bangalore,

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Genl and Rev Departments, Bangalore

Agn 196-09
11-8

Sir,

As called for in Government Proceedings No 7244-7/Fdn 196-09-7 dated 21st February 1910 I am herewith submitting in original reports that I have received regarding the progress made by Messrs B Venkata Rao and A Yegnanarayana Iyer in their studies in Europe. I have as yet received no report from Mr Yegnanarayana Iyer with regard to his agricultural studies in Cambridge University although I called for it some time ago The course in Dairying in Reading he took up on his own initiative and I doubt very much whether he will be able to use the training obtained on his return to Mysore if as is the rule throughout India the matter of cattle breeding etc be left to the Veterinary Department ~~[illegible]~~ From the report it seems also clear that the training obtained by Mr Yegnanarayana Iyer was incomplete owing to the shortness of time and I need hardly point out that incomplete training is likely to be anything but satisfactory There seems to be a desire on the part of both the scholarship holders to spread themselves over too much ground

With regard to Mr Venkata Rao's report I shall be prepared

to make comments upon it only after receiving some additional information from Mr Venkata Rao This I had hoped to have received ere now and this fact accounts for the delay in forwarding the report

I have the honor to be,

Sir,

Your most obedient servant,

Leslie B Coleman

For Agricultural Chemist

Report sent by Dr F Lohnis, Leipzig University on the work of Mr B Venkata Rao during the winter term

Translation

Agricultural Institute of the University of Leipzig

Leipzig, February 25th 1910

I hereby certify that Mr B Venkata Rao was immatriculated at the Leipzig University at once on his arrival here As his knowledge of German was insufficient for him to attend lectures and take up laboratory work the first thing necessary was a study of the language For this purpose Mr Rao attended the Berlitz School of Languages but as the cost was too high (100 mks for 50 lessons in a month) he took lessons later from a private teacher At the same time he studied German works and especially the most important ones in Agricultural Chemistry and Agricultural Bacteriology according to the plan of studies laid out by me for Mr Rao He will begin in the summer term of 1910 investigations " on the decomposition of stable manure " in my laboratory which in the year 1911 are to be used for his ~~Examen~~ Doctor's thesis The necessary preparatory work has been completed by him in the last month in this laboratory He also attended my lectures in order to accustom himself to German lecturing The division of the work has been so arranged that the whole course of study will be ended in the winter term ~~1911/12~~ 1911/12

(Signed) Dr F Lohnis
Privatdocent of the University

Johannis Allee 21

LEIPZIG, den 25 Februar 1910

Ich bescheinige hiermit, daß Herr B Venkata Rao sogleich nach seiner Ankunft in Leipzig an der hiesigen Universität immatrikuliert wurde. Da seine Kenntnisse der deutschen Sprache nicht hinreichend waren, um ihm die sofortige Teilnahme an den wissenschaftlichen Vorlesungen und Übungen zu gestatten, war eine entsprechende Ausbildung erstes Erfordernis. Zu diesem Zwecke besuchte H Rao zunächst die „Berlitz School of Languages", da jedoch die Kosten hier zu hoch waren (100 M für 50 Lektionen pro Monat), so nahm er späterhin Unterricht bei einem deutschen Privatlehrer. Gleichzeitig arbeitete er sich nach meiner Anleitung in die deutsche Literatur ein, speziell studierte er die wichtigsten agriculturchemischen und agriculturbakteriologischen Werke. Nach dem von mir aufgestellten Studiengang wird Herr Rao im Sommersemester 1910 mit Untersuchungen über Zersetzungen der Stalldünger, zu dem uns unterstellten Laboratoriumbetrieb gehörig, beginnen, die im Jahre 1911 in einer Promotionsschrift zur Erlangung der Doctor-Titels niedergelegt werden sollen. Die nötigen Vorarbeiten wurden von ihm im letzten Monat im hiesigen Laboratorium erledigt, ebenso hat er in den letzten Wochen meine Vorlesungen besucht, um sich an den deutschen Vortrag zu gewöhnen. Die weitere Entscheidung ist so getroffen, daß der ganze Studiengang im Wintersemester 1911/12 beendet sein wird.

Dr. F. Löhnis

UNIVERSITY
READING

BRITISH DAIRY INSTITUTE

READING, April 21 1910

Re Mr. R K Narayan

Mr. Narayan attended the British Dairy Institute as a student during the months of March and April 1910 He took instruction in Cheese-making Buttermaking Dairy Management Refrigeration, and Milk testing & analysis Mr. Narayan has taken a keen interest in the above subjects during his course here - he has done good work and he has given me the impression that he is a good student & that he would be a great success as a dairy student if he were to continue in the study of dairy work I am of opinion that Mr. Narayan would have no objection to securing the National Diploma in Dairying if he were to take up the idea

Miles Benson

Extract from a private letter, dated the 5th May 1910, from Mr Yegna Naravana Iyer

My dear Balasundaram Iver,

I am exceedingly glad that I thought of spending my last vacation in Reading for I really learnt lot, and there was a little examination at the end of the course in which I got 90 marks out of 100 that being the first the manager who is the Chief Inspector said that he hadn't come across foreign students like me, and foreign students always did well he said
